The largest lexical part is represented by anglicisms which are used most in Belgian mass-media of the capital and regions as well. Anglicisms can get French morphemes («look», «sample», «surf», «flash») which means the accommodation of English and French on the territory of Belgium and perhaps, a major speakers security in terms of English language.

Linguistic situation of French-speaking Walloons and Brusselians exposes the following image: it reveals a linguistic insecurity from the one side, from the another a growing recognition of linguistic legitimacy of forms different from French of France. Just because of this fact French language in Belgium presents “crossroad” [5, p. 289] of issues, which solutions can be an curious object of future investigations.

ТИПИЧНЫЕ ЧЕРТЫ ПОВЕСТВОВАТЕЛЬНОГО СТИЛА НАРОДНЫХ СКАЗОК

Аннотация
Статья посвящена рассмотрению таких приемов повествовательного стиля народных сказок как повторение одного и того же мотива буквально, или с незначительными вариациями (сказочная ретардация) наражание эффекта, параллелизм сказочных образов, типов, мотивов и комбинаций мотивов, использование тяпических сказочных фраз (хронологического или топографического зачина и рамрующего исхода).

Ключевые слова: народная сказка, сказочный мотив, ретардация, числовой символизм, параллелизм, сказочные формулы, зачин, исход.

TYPICAL FEATURES OF THE FOLKTALE NARRATIVE STYLE

Abstract
The article dwells on the typical features of the folktales narrative style such as the total or ranging motif repetition (folktales retardation), the motif effect intensification, using parallel interrelated folktales motifs and characters alongside typical folktales formulas (chronological and topographic beginnings and rhyming endings).

Keywords: folktales, folktales motif, retardation, number symbolism, parallelism, folktales formulas, beginning, ending.

It there is any single genre that has captured the imagination of people in all walks of life throughout the world, it is the fairy tale. The scholarly study of oral folk tale and literary fairy tale has expanded commensurately over the past fifty years and the diversity of analytic approaches to folk and fairy tales has enriched the fields of literature, anthropology, cultural studies, comparative linguistics, psychology, philosophy and others.

This article aims at pointing out the typical features of the folktales narrative style – a special combination of narrative techniques which are called “folktales ceremonialism” by A.N. Afanasiev [cit. 6, p. 11].

Folklorists generally make a distinction between wonder folk tales, which originated in oral traditions, and literary fairy tales, which emanated from the oral traditions through the mediation of manuscripts and print, and continue to be created today in various mediated forms. According to Jack Zipes, the author of The Irresistible Fairy Tale: The Cultural and Social History of a Genre, it is almost impossible to give an accurate definition to either a wonder folk tale or a literary fairy tale as well as explain the relationship between the two modes of communication because “the tale types influenced by cultural patterns are so numerous and diverse” [7, p. 3].

Following the definition presented in The Greenwood Encyclopedia of Folktales and Fairy Tales “the folktales is a form of traditional, fictional, prose narrative that is said to circulate orally. In both colloquial use and within folkloristics, the term “folktales” is often used interchangeably with “fairy tale”, “märchen” and “wonder tale”, their histories being interrelated and their meanings and applications somewhat overlapping” [2, p. 363].

Let us point out that the confusion of terms is rooted in the insistence that literary and oral tales have to be held distinct although the themes and the narrative techniques employed in both genres have much in common.

The term “folktales” is a direct translation of the German term Volksmärchen, widely used by Wilhelm and Jacob Grimm who bore the palm of setting the generic parameters, contrasting the legend, myth and folktales as discrete narrative forms. For the Grims, folktales were “the unmediated, uncorrupted voice of the folk”, written down with minimal editorial changes and in adherence to the sentiments of the folk [2, p. 364]. The folktales collections of the nineteenth century compiled by the Grimm brothers served to standardize and canonize the diverse tales told orally.

The term “fairy tale” appeared to describe the “elaborate, layered, discursive conversational creations” of the seventeenth- and eighteenth- century French salon writers. Some of those works were eventually put into print and became the so-called fairy-tale canon [2, p. 363].

Finally, the term “wonder tale” seems to embrace both “folktales (Marchen) … and art fairy tales (Kunstmärchen) of later invention” and refer to tales involving marvelous elements and occurrences transformed or social 注解 and metamorphoses [4].

Narrative techniques are the methods used to tell stories. When analyzing a folktales, it is important to identify these techniques in order to shed light on the ways in which they function in the story. Although a single article cannot cover all the types of narrative techniques, there are a few types of techniques that can be found in the majority of folktales irrespectively of their origin.

A typical folktales is characterized by sustainability, stereotyped form and style which shape up in the telling. The special techniques which provide for the unique folktales narrative style are as follows.

The literary device of motif is understood as any element, subject, idea or concept that is constantly present through the entire body of a folktales. Speaking in general, the motif of a handsome prince falling in love with a damsel in distress or a stepdaughter as opposed to a wicked stepmother, evil witch or beast are common motifs for the whole genre. Speaking more precisely, a motif can be viewed as the repetition of one and the same traditional formula, detailed description of an action or ornamental adjectives
In a certain realm, in a certain land, in a little

Once upon a time, a certain folktale is told. It begins with a series of numbers: three, four, seven, twelve, and thirteen. These numbers are significant in the narrative, as they symbolize aspects of the Soviet verbal culture from the time of its rise. Much was done to study post-Soviet verbal culture, i.e., general principles and patterns of "linguistic life" of the Soviet society, which is analyzed in the work of Volkov, R.M. "Словарь фольклора СССР" (1989). 3.

Folktale episodes are typically repeated three times. If a set number of wishes is granted or a few challenges are to be faced, the number of wishes is granted or a few challenges are to be faced, the number three (the wife of a tsar who wears three pairs of boots or gowns at three Hosts on his quest), and tasks the hero is commissioned with (spending three days and / or three nights in an enchanted place). As for numbers nine and twelve, they are less used and mainly serve to multiply number three (the wife of a tzar gives birth to triplets three times; the hero has to recognize his beloved one among the twelve daughters of the Sea King and he is given three attempts) [6, p.13].

Another narrative technique to be discussed is the one of the effect intensification and it has a ring of folktale retardation technique already described. The folktale motifs are rendered in such a manner that each following motif intensifies the effect of the previous one. For instance, in folktale about the persecuted stepdaughter, the motif of persecution is typically deepened by the motif of the stepmother’s compplot to exterminate the stepdaughter.

As a rule, folktale character types and motifs are parallel. The kind and weak-willed husband is always opposed to the quarrelsome and insistent wife, just as two elder and more successful brothers are contrasted with the younger and less intelligent one. If the stepdaughter’s meek temper wins people’s hearts and brings her a reward, the stepmother is punished for her evil deeds.

Folktales abound in typical formulas, especially at the beginning (Once upon a time, and a very good time it was too, when the streets were paved with penny loaves and houses were whitewashed with buttermilk and the pigs ran around with knives and forks in their snouts shouting ‘eat me’ ‘eat me’ (Irish); Once upon a time, and a very good time too, though it was not in one’s time, nor your time, nor for the matter of that in any one’s time... (British); In a certain kingdom, in a certain land, in a little village, there lived... (Russian) and at the end (If my story is not true, may the soles of my shoes turn to buttermilk (Irish); In that town there was a well and in that well there was a bell. And that is all I have to tell; Step on a tin, the tin bends. This is how my story ends (British); The happy pair lived in good health and cheer for many a long and prosperous year (Russian)) [5]. Folktale beginnings are most commonly either chronological (Once upon a time there was...) or topographic (In a certain realm, in a certain land...). Folktale closings are characterized by rhyning: Be bow, Bend it, My quest, And give me the sunshine, And lend me the tine. To sum up, the motif repetition as a means of stylistic retardation, the gradual intensification of motifs, parallelism of folktale characters and motifs and typical folktale formulas, especially at the beginning and at the end of the tale all contribute to the unique folktale narrative style sustaining its epic ceremonialism.

SOVIET VERBAL CULTURE: MAJOR RESEARCH QUESTIONS AND PROBLEMS

Abstract
Soviet verbal culture, i.e. general principles and patterns of “linguistic life” of the Soviet society, is analyzed in the article. Various aspects of the Soviet verbal culture are studied from the time of its rise, much was done in post-Soviet era but despite a great number of research papers dedicated to it, including fundamental ones, it has been studied insufficiently and rather one-sidedly.

Keywords: language, culture, Soviet verbal culture.
